COLUMBIA UNIVERSITY

Columbia University was founded in the year 1901 by the Most Reverend Alexander A. Christie, D. D., the present Archbishop of the see of Oregon City. The institution is conducted by the Congregation of the Holy Cross, a religious body of men devoted to the higher education and Christian training of young men. Since the close of the first scholastic year the school has been conducted by this eminent teaching body.

The University is beautifully and healthfully placed on a location ideal in its surroundings for the pursuit of study and the development of strong, manly character. The eastern bank of the Willamette River in northern Portland rises abruptly to a height of one hundred and eighty feet, and from this elevation the University grounds and buildings afford a magnificent outlook on an inspiring stretch of scenery, unsurpassed in grandeur anywhere. One sweep of the vision takes in the quiet freshness of the Coast Range, the solemn, rugged features of the Cascades, five snow-capped mountain peaks, the gleaming flood of the majestic Willamette—all of which form a gorgeous panoramic setting for the city of Portland.

The mild climate of Western Oregon particularly commends the location of the University. Throughout the entire year the temperature varies little. Excessive cold or heat is comparatively unknown. Portland's death rate has been reputed the lowest of any in the country. In the history of the University there has not been a single case of serious illness. Extensive grounds afford ample opportunity for physical exercise and outdoor sports so necessary to the developing student.

UNIVERSITY BUILDINGS

THE ADMINISTRATION BUILDING

The principal structure on the University grounds fronts Portland and overlooks the main channel of the Willamette River. It is a brick building, five stories in height, and is built in a strong, beautiful style of architecture. The library and scientific museum are temporarily located here. It also contains the executive offices, private rooms for members of the faculty, the University chapel, elementary chemical laboratories, class rooms, dining rooms and dormitories for the students. This building is lighted by electricity and gas and heated by steam.

THE LIBRARY

The Library is well adapted to the literary and scientific work of the students, and though sufficiently large and comprehensive at present, is constantly being added to as progress is made in the various departments. The departments of Literary Criticism, History, Political Science and Technical Subjects are well represented. There is also a separate department under special management for the use of the younger students. Ample reading room is provided where certain rules conduce to make pleasant and profitable the time spent in reading or research. The best literary magazines and reviews, as well as the current numbers of scientific and technical journals, are kept on file. Students have access to the Library at certain hours from 8:00 a. m. to 9:00 p. m.

THE SCIENTIFIC DEPARTMENT

is located in the north wing of the Administration Building. The departments of Physics, Philosophy, Botany and Biology have recitation rooms and laboratories in this section. The extensive equipment for each of these departments is constantly being augmented.

THE CHEMICAL LABORATORIES

occupy a large section of the fifth floor of the main building. Here are the general inorganic, organic and elementary chemical laboratories. Each laboratory is provided with ample hood accommodations, and each desk is furnished with water, gas and suction.

THE INFIRMARY

This department of the University is devoted to the care of sick students. It consists of rooms for the use of students during illness. They are cared for by the Sisters of the Presentation. When necessary the University physician is in daily attendance.

THE GYMNASIUM

adjoins the campus used for outdoor sports. The track-hall is 190 feet long by 120 feet wide. It is kept in excellent condition and is used for indoor track meets, winter baseball practice, basketball, tennis and all manner of running, jumping, pole-vaulting and weight-throwing. The arched roof does away with supporting pillars and affords a free, unobstructed ground room convertible into an immense playground during the rainy season. It holds out to all a convenience for athletics not ordinarily accorded students in any other educational institutions west of the Rockies.

The outdoor campus consists of five acres of ground north of the Gymnasium. Here are laid out the baseball diamonds, the football gridiron and tennis courts, all of which afford general opportunities for outdoor exercise in agreeable weather. A six-lap track encircles the plot and every convenience is at hand for the successful direction of all outdoor sports. The total stretch of University campus open to the use of the students covers more than twenty-five acres.

SYSTEM OF INSTRUCTION

The entire plan of studies is based on the modified elective system. The student is free to select his own curriculum conformably to his natural liking, the career in life he may have in view, or the determinate intellectual bent developed during his secondary school years; but though he is free to elect his own studies, he has not, however, unlimited freedom in this respect. The principle of general election is modified. Lest the young Freshman in his inexperience choose unwisely, he is aided in making his choice of studies by being permitted to select from among a number of parallel programs leading to baccalaureate degrees. Three programs are open for his choice in the Colleges, each embracing courses which, in the opinion of the Faculty, contribute best to cultural or professional knowledge. These programs are in some cases, made elastic by the introduction of elective courses, especially in the Junior and Senior years. Students who wish to spend a limited time in study and cannot complete all the courses in a program for a degree, may register as special students and elect any courses for which their preparation has fitted them.

The hours scheduled in the different programs are credit hours based on the average amount of time required for attendance at recitations and the time necessary for preparation of recitations. One hour of recitation is regarded as the equivalent of two hours of laboratory work. The minimum number of credit hours which a student must carry is sixteen, the maximum number which he may carry is twenty. Students who wish to take more work than is indicated by the maximum requirements must apply by formal petition to the Faculty for the requisite permission.

REGULATIONS GOVERNING ADMISSION TO THE COLLEGIATE COURSES

Candidates who wish to enter any of the Collegiate Courses must present evidence, either by examination or by a properly attested certificate, of ability to enter on the courses of the Freshman year. The specific subjects required for entrance will be found later in this catalogue.

Examinations in all the subjects required for admission to Columbia University are held at the University in September, at the beginning of the Fall Semester, and in January at the beginning of the Spring Semester.

A candidate failing to pass satisfactory examinations in one or more of the subjects required for admission to any college program may, at the discretion of the Faculty, be admitted to his class, conditioned to make up his deficiency by extra study *within one school year*. Only when the conditions are removed will the student be admitted to full standing in his class.

Graduates of High Schools that are *fully accredited* to the State Universities will be admitted without exami-

nation to the Freshman year of any program to which their preparatory studies entitle them.

Certificates of work done in public High Schools or in private Preparatory Schools will not be accepted instead of examinations, unless the applicant has passed the final examinations after full courses in his school, and the Faculty of the University are satisfied with the standing of the school.

Candidates for admission to advanced standing who are required to take examinations must pass, *in addition* to the usual entrance examinations, an examination in the work already done by the classes they desire to enter. The additional subjects may be found in the several programs of studies described later in this catalogue.

Applicants for advanced standing who present certificates from other colleges or universities may be received at the discretion of the Faculty with or without examinations as regards particular cases.

No student will be admitted to any course of the Senior year until all conditions have been cancelled.

Catholic students are required to take the required courses in Evidences of Religion.

DECREES

Degrees are conferred only on regular students who have satisfied the full entrance requirements and have completed satisfactorily the courses prescribed. The courses required for the several degrees conferred by the University will be found described later in this catalogue. Written theses and final examinations are demanded of all candidates for degrees. One full scholastic year of resident study is absolutely required.

BACHELORS

The courses of study offered to candidates for the degree of Bachelor extend by fixed programs through four scholastic years. In the College of Letters and Arts one of three degrees is conferred on an undergraduate—Bachelor of Arts (A. B.), Bachelor of Letters (Litt. B.), Bachelor of Philosophy (Ph. B.)—dependent on the special program of studies the candidate selects.

In the College of Music one degree is offered, Bachelor of Music (B. M.). In order to obtain this degree the candidate must have studied music in the University for one complete year. He must have a thorough theoretical knowledge of four instruments mentioned in the courses described later, and a practical mastery of one of them. He shall pass a written examination in harmony, counterpoint and composition, and he must submit to the examiner two original compositions: (a) A fugue for full orchestra, or for four voices with independent orchestral accompaniment; (b) a composition in the free form (sonata or rondo) for pianoforte, or a trio (pianoforte, violin and violincello).

The degree of Bachelor will not be conferred unless the candidate shall have been in residence for one complete scholastic year in his *Senior* year of study.

SPECIAL STUDENTS

Students who do not wish to become candidates for a degree by following the prescribed courses of any program may register as special students and attend any of the courses of instruction for which their previous academic training has fitted them. Such special students are governed by the same regulations and discipline as

the other undergraduates. They are required to pass the same examinations in the courses they pursue as the other students. In exceptional cases men of mature age, who have been out of school or college for several years, but whose training in practical affairs has been sufficiently educative, will be accepted as special students by satisfying the Faculty of their ability to pursue with profit any course of instruction.

On leaving the University special students may receive on application certificates stating their proficiency in the courses they have pursued.

DISCIPLINE

Official reports of each student's class standing will be sent to parents and guardians every two months.

The Faculty maintain that an education which gives little attention to the development of the moral part of a youth's character is pernicious, and that it is impossible to bring about this development where students are granted absolute relaxation from all Faculty government while outside the class-room. A young man must learn obedience to law by the actual practice of obedience, not merely by appeals to honor.

Moreover, the quiet and concentration of mind that are needed for college work are not obtained except where discipline exists.

Therefore the following regulations, shown by experience to be salutary, are enforced at the University:

1. No student shall leave the University grounds without permission from the President or the person delegated to represent him. Day scholars are subject to a modification of this rule.

2. Leave of absence will not be granted to students during the term time, except in cases of urgent necessity.

3. Students are required to report at the University immediately after arriving at Portland. This rule is binding not only at the beginning of the scholastic year, but at all other times when leave of absence has been granted. Unnecessary delay in Portland is looked upon as a serious violation of rule.

4. Flagrant disobedience to authority, cheating in examinations, the use of intoxicating liquors, immorality, the use of profane and obscene language, and an unauthorized absence from the University limits are among the causes for expulsion. In case of suspension or expulsion for such offenses, no fees shall be returned.

5. No branch of study shall be taken up or discontinued without the consent of the Director of Studies.

6. The use of tobacco is forbidden except to such students as have received from their parents written permission to use tobacco.

7. Continued violation of regulations leads to forfeiture of rooms.

8. Although students of all religious denominations are received, the University is nevertheless a strictly Catholic institution, and all students are required to attend divine service in the University Chapel at stated times.

9. The use of intoxicating liquors is positively prohibited.

10. Undue attention to athletics at the expense of study will not be permitted; but students are expected to take part in outdoor sports.

11. A limited number of athletic contests is permitted with college organizations from without.

12. All athletic associations of the students are strictly forbidden to countenance anything that savors of professionalism.

13. All athletics are governed by a Faculty Board of Control. The Vice-President of the University and four members of the Faculty will compose this Board, and reserve the right of a final decision on all questions concerning athletics. The Faculty Board will determine the amateur standing of the members of the athletic teams and apportion the finances. By this means indiscreet and unconsidered action of students will be checked.

COLLEGE
OF ARTS AND LETTERS

DEPARTMENT OF CLASSICS

DEPARTMENT OF LETTERS

DEPARTMENT OF HISTORY AND ECONOMICS

THE COLLEGE OF ARTS AND LETTERS

The College of Arts and Letters includes courses of study leading to the degrees of Bachelor of Arts, Bachelor of Letters and Bachelor of Philosophy. The two latter courses are modifications of the one leading to the degree of Bachelor of Arts, which until recent years was known as the Program of Classics and embraced studies in the ancient and modern languages, in English literature, in history, the natural sciences and in mathematics.

The demand of students for greater freedom of election in courses led to the formation of other programs which embraced certain studies not contained in the Program of Classics but which lead to degrees equivalent to the degree of Bachelor of Arts. In the matter of election of courses the student is permitted greater freedom in the program leading to the degree of Bachelor of Letters than in either of the other groups. The degrees now under charge of the College of Arts and Letters are the ordinary degrees of Bachelor of Arts, Bachelor of Letters, Bachelor of Philosophy and Master of Arts.

The location of the University offers special advantages for study. It is situated on a beautiful tract where cultivation has aided nature, four miles from the noisy bustle of city life. This removal from the distractions of the town gives the students opportunity to pursue their work with the quiet and concentration needed for earnest study. The Faculty live on the grounds of the University, dine with the students, and are accessible to them at any time. The benefits derived from this constant association with professors can not be overestimated.

Facilities for work are found in the libraries and laboratories. The library has a complete collection of bound volumes well selected. The leading literary and scientific reviews are kept on file. Books may be borrowed under easy regulations. The library contains ample reading-room space and is well lighted so that students may use it at night. It is open every day from 8 o'clock a. m. to 9:00 p. m. There are also special collections of books in the various departments of the College, mainly works of reference. Under certain conditions the city library of Portland is open to use by students of the University.

ENTRANCE REQUIREMENTS

ENGLISH. Part of the examination time is given for answering questions upon books required to be read in the preparatory courses in English; the remainder, for writing an essay.

LATIN. Grammar, complete; *Caesar*, four books of the Gallic War; *Cicero*, four orations against Catiline; *Vergil*, *Aeneid*, six books; translation at sight of passages from *Cicero* and *Caesar*; translation of English into Latin based on the text of the authors.

GREEK. (*For Students in the Department of Classics only*) Grammar, etymology, and general rules of syntax; *Xenophon*, *Anabasis*, four books; *Homer*, at least three books; prose composition based on text.

HISTORY. A general knowledge of the outlines of Greek and Roman History and of Medieval and Modern History, as set out in the texts used in high schools and other secondary schools.

CIVIL GOVERNMENT. The Constitution of the United States; Federal Government and State Government.

ALGEBRA. The whole subject as far as logarithms, as given in *Wentworth's College Algebra*, or an equivalent in the larger treatises of other authors.

GEOMETRY. Plane and Solid, including the solution of simple original problems and numerical examples as given in the works of *Wentworth, Chauvenet, Newcomb*, or an equivalent in treatises by other authors.

PHYSICAL GEOGRAPHY. As given in *Tarr's* text-book or an equivalent treatise.

ZOOLOGY. Elementary.

PHYSIOLOGY. *Martin's Human Body*, or an equivalent text.

BOTANY. Elementary.

CHEMISTRY. Elements of inorganic chemistry. The preparation in this subject must include a course of lectures and recitations, and laboratory work in which at least fifty experiments have been exemplified.

PHYSICS. Elementary. The preparation in this subject should include a course of lectures illustrated by experiments, and recitations from a text-book similar to *Carhart and Chute's*, *Gage's* or *Millikan and Gale's*. Laboratory work is required. Applicants may present either chemistry or physics provided either subject has occupied one whole year with five recitations a week.

FRENCH AND GERMAN. A three years' study of either German or French and one year of French or German is required for entrance on the Program in Letters and the Program in History and Economics. Students who began French in the second preparatory year must have taken up German in the fourth preparatory year and shall continue it for two years in the College Course. A like

regulation holds for those who began German in the second preparatory year. Applicants for the Program of Classics present a year of French or German.

The entrance examination requires sight translation of ordinary German or French prose: an ability to translate, rather than accurate grammatical knowledge is expected.

FOURTH YEAR

DOGMA. God the Creator. God the Redeemer. Sanctification. Grace. The Sacraments. The Church as a Means of Salvation. Text-book, *Wilmer's Handbook of the Christian Religion*.

DRAWING, ARTISTIC

In this department the aim is to lay a thorough foundation in drawing for those who wish to make Art a profession, but the courses are so arranged as to be accessible to other students. The system of teaching, which is that followed in the best art schools, is intended to develop the individuality of each student, so that with a good understanding of the principles of art, he may interpret nature according to his own temperament.

The work is done altogether from cast, object and nature. The immediate surroundings of the University buildings, the mountains and the Willamette River offer many beautiful subjects for the study of landscapes, and the classes are taken out in the Summer for this study.

There is a complete set of decorative and architectural ornaments, taken from monuments of antiquity, the Middle Ages and the Renaissance, and of elements of the human figure (hands, feet, etc.) from the antique, and some anatomical pieces.

ELEMENTARY CLASS

I.

(a) Drawing from casts of ornaments purely geometrical, such as moldings, ovoloes, dentils, etc. Sketching from simple objects.

(b) Drawing from casts of ornaments of which the elements are living forms, such as ornamental leaves and flowers. Sketching from nature, leaves and flowers.

(c) Drawing from architectural elements, such as pedestals, bases, shafts, cornices, etc. Lectures on per-

spective, direction of the principal lines in relation to the horizon. Elementary notions of the five orders of architecture.

PREPARATORY SCHOOL

PREPARATORY SCHOOL

The University maintains a fully equipped Preparatory School. The schedules of studies are arranged to meet the need of thorough preparation for collegiate work, and embrace courses which, while giving as wide an education as can be obtained in the very best High Schools, prepare students directly for the group of studies they may elect when entering the Freshman year. Five different programs of instruction are offered to students, each containing such special courses as directly meet the needs of fifteen college groups, while all embrace common subjects which are indispensibly necessary in acquiring a fairly liberal education. The period of instruction covers four years.

The equipment and facilities for study in the Preparatory School are most complete. The laboratories are extensive and fully supplied with the latest improved appliances. The classes pursuing any subject are divided into sections, each containing a limited number of students. The sections are purposely limited in order that each student may receive close attention from the instructor in every recitation and laboratory period.

Examinations for admission are held at the opening of the School in September, and embrace the subjects completed in the highest grade in the Grammar School. The expense for tuition, board, laundry, etc., will be found on pages 18 and 19. The following fees are special to the Preparatory School:

PREPARATORY COURSES

CIVIL GOVERNMENT

A.

This is a study of the science of government in connection with American institutions, and is intended to give the student some knowledge of the general principles of government and of the American Constitution. The subject begins by defining government; then is considered the object and necessity of government; origin of civil society; the principle of suffrage; different forms of government defined and compared; theories of representation. These topics necessarily are treated briefly, as the principal part of the course consists of a study of the Colonial government, the Articles of Confederation and their defects, the formation of the Constitution and its adoption. The study further comprises a critical analysis of each article and section of the American Constitution, thus enabling the student to acquire a clear conception of the division of powers of the National Government and the duties and responsibilities of each department. Text-book, *Government by State and Nation*, by James and Sanford.

DRAWING

A.

This work is based on the rudiments of drawing and consists of the training necessary for the hand and the eye. Sketching is also done from simple objects of various forms.

[Five hours a week for one semester.]

B.

Advanced work in sketching from objects such as the plaster cast of flowers and suitable ornaments which afford the study of light and shade.

[Five hours a week for one semester.]

ENGLISH

A.

(a) Lockwood and Emerson: *Composition and Rhetoric*, with daily exercises in class. Two themes a week.

(b) The elements of versification. Scansion, one hour a week. Weekly exercises in writing verse. Memory work.

(c) Required reading: Robinson Crusoe, *Evangeline, Treasure Island, Snow-Bound, *The Sketch Book, *The Vision of Sir Launfal, *Poe's Tales*, *Poe's Poems*, *Julius Cæsar, *The Merchant of Venice.

(The works marked with an asterisk are to be studied; the others read.)

[Five hours a week for two semesters.]

B.

(a) *Hill's Principles of Rhetoric, Part I*, with daily exercises in class. Two themes a week.

(b) The simpler verse forms. Weekly exercises. Memory work.

(c) Required reading: Ivanhoe, *The Lady of the Lake, *The Vicar of Wakefield, *The Ancient Mariner, The Courtship of Miles Standish, *Silas Marner, *The Princess, *Macbeth, *As You Like It.

(The works marked with an asterisk are to be studied; the others read.)

[Five hours a week for two semesters.]

C.

(a) *Hill's Principles of Rhetoric, Part II*, with daily exercises in class. Weekly theme first semester; fortnightly essay second semester.

(b) Verse forms continued. Weekly exercises. Memory work.

(c) Required reading: *Sir Roger de Coverly, **Macaulay's* Essay on Addison, *The Golden Treasury of English Lyrics, **Macaulay's* Essay on Milton, **Milton's* Minor Poems, *A Midsummer Night's Dream, **Burke's* Speech on the Conciliation of America, **Webster's* Bunker Hill Oration, **Lincoln's* Gettysburg Oration, *King Lear.

(The works marked with an asterisk are to be studied; the others read.)

[Five hours a week for two semesters.]

D.

(a) *Genung's The Working Principles of Rhetoric, Part I*, with daily exercises in class. Fortnightly essay first semester; monthly essay second semester.

(b) Verse forms concluded. Weekly exercises. Memory work.

(c) Required reading: The House of the Seven Gables, *The Idylls of the King, Selections from *Paradise Lost*, *Cary's* Dante, *Gates* Selections from Newman, *The Dream of Gerontius, *Pope's* Homer, *The Tempest, *Aubrey de Vere's* Poems, and *Hamlet.

(The works marked with an asterisk are to be studied; the others read.)

[Five hours a week for two semesters.]

FRENCH

A.

Grammar with written and oral exercises; the inflection of nouns and adjectives, the use of all the pronouns, the conjugation of regular and the common irregular verbs; the correct use of moods and tenses, the essentials of French syntax, and the common idiomatic phrases.

Frazer and Squair's Grammar. Reading three of the following: *La Tache du Petit Pierre*, Mairat; *Un Cas de Conscience*, Gervais; *La Main Malheureuse*, Guerber; *Sans Famille*, Malot; *Super's Readings from French History*.

[Five hours a week for two semesters.]

B.

Advanced grammar and composition, study of idioms, memorizing. *Frazer and Squair's Grammar*. Dictations and conversations are added on practical topics, and careful translation made of five of the following works: *Le Voyage de M. Perrichon*, Labiche; *Roman d'un Jeune Homme Pauvre*, Feuillet; *Fables choisies*, La Fontaine; *Le Medecin Malgre Lui*, Moliere; *Le Cid*, Corneille; *Esther*, Racine; *Pages oubliees de Chateaubriand*; *La Question d'Argent*, Dumas; *Standard French Authors*, Guerlac.

[Five hours a week for two semesters.]

C.

The study of this course is devoted chiefly to the prose and poetry of the nineteenth century and includes composition, conversation, history and general view of French literature. Besides a reading and criticism of the best writers, such as: *Causeries du Lundi*, Ste. Beuve; *On Rend l'Argent*, Coppee; *Hernani*, Hugo; *Meditations*, Lamartine; *Athalie*, Racine; *L'Avare*, Moliere; *Mlle. de la Seigliere*, Sandeau; *Les Origines de la France Contemporaine*, Taine; *Expedition de Bonaparte en Egypte*, Thier; *Ste. Elizabeth de Hongrie*, Montalembert; *Historie de la Litterature Francaise*, Duval.

[Four hours a week for two semesters.]

N. B.—The works studied are not necessarily the same every year.

GREEK

A.

GRAMMAR. Etymology, *Goodell*.

LESSONS FOR BEGINNERS, *Morrison and Goodell*.

EPITOME OF THE NEW TESTAMENT, Part I, *Stoffel*.

[Five hours a week for two semesters.]

B.

GRAMMAR. Etymology reviewed and Syntax begun.
Goodell.

XENOPHON. Anabasis, Four Books, *Smith*.

COMPOSITION. Based on the Anabasis.

EPITOME OF THE NEW TESTAMENT, Part II, *Stoffel*.

[Five hours a week for two semesters.]

C.

GRAMMAR. Completed.

XENOPHON. Selections from Memorabilia.

PROSE COMPOSITION.

HOMER, *Iliad*, Six Books, *Seymour*.

EPITOME OF THE NEW TESTAMENT, Part III, *Stoffel*.

[Five hours a week for two semesters.]

GERMAN

A.

Grammar, *Thomas, Part I*. Translations from German into English of simple prose; translation of English exercises into German. Reading of short stories and selections from more difficult prose.

German Reader, *Thomas and Hervey*.

[Five hours a week for two semesters.]

B.

Grammar, *Thomas, Part II*. Translation into German of narrative prose and selections from history.

Herman and Dorothea, *Goethe*; Lichtenstein, *Hauß*.

[Five hours a week for two semesters.]

C.

Grammar, *Thomas, Parts III and IV*. Sight reading of plays, poems and prose writings. Translation of selections from history and literature; original essays.

Minna von Barnhelm, *Lessing*; Best known poems, *Heine*; Correspondence, *Schiller-Goethe*.

[Four hours a week for two semesters.]

HISTORY

A.

ANCIENT HISTORY. *Meyers' Ancient History*. The Eastern Nations. The History of Greece and of the Empire of Alexander. The Story of Rome. The Establishment of the Empire, and the rise of Christianity. The Roman-German, or Transition Age.

[Five hours a week for two semesters.]

B.

MEDIEVAL HISTORY. *Meyers' Medieval History*. The Barbarians and their Kingdoms. Mohammedanism and the Saracen Caliphs. The Holy Roman Empire. The Age of Revival. The Empire and the Papacy. The Great Schism and the rise of the Nations of Modern Europe.

[Four hours a week for one year.]

C.

MODERN HISTORY. *Fisher's Outlines of History*. The Renaissance. The Age of Discovery. The Protestant

Reformation. The Power of Spain. The Strifes of France with Spain and Germany. The Age of Louis XVI, and the rise of Russia. The Spanish and Austrian Successions. The Empire of England. The American Revolution. The French Revolution and the Wars of Napoleon. The Revolutions and the Spirit of Nationality. The formation of Germany and Italy.

LATIN

A.

GRAMMAR. Etymology, *Bennett*.

EXERCISES. First Latin Book, *Hale*.

[Five hours a week for two semesters.]

B.

GRAMMAR. Review of Etymology, Syntax, *Bennett*.

CAESAR. Books I-IV.

PROSE COMPOSITION. Based on *Caesar*.

[Five hours a week for two semesters.]

C.

GRAMMAR. Syntax, *Bennett*.

NEPOS. Selected Lives.

SALLUST. Catiline.

CICERO. Orations I-III, against Catiline.

PROSE COMPOSITION. Based on authors read.

[Five hours a week for two semesters.]

D.

GRAMMAR. Complete review.

CICERO. Three orations including *Pro Lege Manilia*.

OVID. Metamorphoses.

VERGIL. *Aeneid*, six books. The explanations cover peculiarity of syntax, figures, mythology.

PROSODY. Study of hexameter verse.

PROSE COMPOSITION. Based on *Cicero*.

[Five hours a week for two semesters.]

MATHEMATICS

A.

ALGEBRA. This course for beginners in Algebra includes a study of the primary fundamental principles necessary to the courses which follow. The subjects dwelt upon in particular are factoring, highest common factor and least common multiple, which are afterwards applied in their relation to Fractions and the reduction of Complex Fractions. In as far as possible, concrete examples of their applications to kindred scientific subjects are applied by the teacher. Text-book *Wentworth's Elementary Algebra*.

[Five hours a week for one semester.]

B.

ALGEBRA. In this course the study of equations is begun and continued through equations of the first degree, fractional equations, systems of simultaneous equations, involution, evolution, radicals and exponents complete the course, which is supplemented wherever possible with problems of practical application. Text-book, *Wentworth's Elementary Algebra*.

[Five hours a week for one semester.]

C.

ALGEBRA. This course begins with quadratic equations, pure and affected, followed by systems of simul-

taneous quadratic equations and those forms of radical equations of higher degree which may be solved by quadratic methods. Ratio and proportion, indeterminate equations, surds, imaginaries, inequalities, the progressions and the binomial theorem finish the work in this course. As in the preceding courses, special stress is placed upon the application of the theory to such examples as will show its application to elementary scientific subject. Text-book, *Wentworth's Elementary Algebra*.

[Five hours a week for one semester.]

D.

GEOMETRY. This subject is completed as far as the end of plane geometry and includes a study of the theorems with proofs of exercises and original propositions. The habit of independent thinking is cultivated to some extent by the solution of special problems of concrete nature intended to exhibit the relation of the process studied to practical examples. Text-book, *Wentworth*.

[Five hours a week for one semester.]

E.

GEOMETRY. The study of solid geometry is taken up in this semester, the course being an extension of that of the preceding semester. Planes, solid angles, polyhedrons, the cylinder, cone and sphere are all studied in detail and the solution of original exercises and propositions of application is made a feature of the course. Text-book, *Wentworth*.

[Five hours a week for one semester.]

F.

ALGEBRA AND GEOMETRY. This course which continues through one scholastic year is designed especially

for those students who wish to take up the study of Engineering. As this necessitates a thorough ground work in mathematics, the first half of the year is given to a review of algebra and geometry, three hours and two hours a week respectively. The most important theorems and subjects are again studied and a more comprehensive view of the subject is attained in the generalizing of many theorems and extending the range of others. Text-book, *Benitz*.

[Five hours a week for one semester.]

G.

ALGEBRA AND GEOMETRY. The work of this semester is entirely given up to an elementary exposition of the application of mathematics to scientific problems and to analysis. In lectures and class work actual problems representing existing and practical conditions are taken up, and the derivation of approximate formulae and an elementary study of curves derived from experiment are included. Text-book, *Benitz*.

[Five hours a week for one semester.]

H.

TRIGONOMETRY. A half year is given to this subject which includes both plane and spherical trigonometry. The work done is the equivalent of that in most of the elementary text-books. Special attention is given to goniometry on account of its application to calculus, and examples of a concrete nature are abundantly supplied. Text-book, *Wentworth*.

[Five hours a week for one semester.]

SCIENCE

A.

PHYSICAL GEOGRAPHY. An introductory and elementary study of the earth and its environments. The student will be led into a closer sympathy with the world about him. The various types of plant and animal life, together with topographical and climatic conditions, will be considered. Text-book, *Tarr*.

[Five hours a week for one semester.]

B.

PHYSIOLOGY. Lectures, recitations and demonstrations with the stereopticon. The study of the human skeleton including the physiology and hygiene of the bones. The action, relation, structure and hygiene of muscles. The digestive, circulatory and excretory systems demonstrated by models and charts. The anatomy and structure of the nervous system and simple experiments on the same. Text-book, *Martin's Human Body*.

[Five hours a week for one semester.]

C.

BOTANY. This course is designed for beginners in this subject; it includes a study of the higher plants with reference to structure of root, stem, leaf, flower and seed. An introduction to the lower forms of plant life and their classification is also given. Text-book, *Bastin's Elements of Botany*.

[Five hours a week for one semester.]

D.

ZOOLOGY. This course includes an introduction to the subject with studies of representative forms and their

classification in the different groups of the animal kingdom. The subject is taught by recitations and laboratory work. Text-book, *Chapin and Rettger*.

[Five hours a week for one semester.]

E.

(a) CHEMISTRY. An introductory course of experimental lectures on familiar subjects such as water, the air and its constituents, common salt, etc., leading up to discussions of the more important elements and their properties, and the fundamental laws and phenomena of chemistry. Text-book, *Clarke and Dennis*.

[Three hours a week for two semesters.]

(b) EXPERIMENTAL CHEMISTRY. A laboratory course to accompany Course (a). A series of exercises to be performed by each student, and having as their main object the cultivation of the student's powers of observation and faculty of inductive reasoning. These exercises comprise a study of the principal metallic elements, including their preparation, properties and more familiar compounds. The directions for each experiment are made as brief as possible; the observation of facts and the drawing of correct conclusions therefrom being left, so far as the nature of the experiment will permit, to the student. Laboratory Manual, *Dennis and Clarke*.

[Two hours (four hours actual work) each week for two semesters.]

F.

PHYSICS. Instruction in elementary physics is given by lectures and recitations in which the general laws of mechanics, heat, acoustics, optics, electricity and magnetism are presented. The course is intended to meet the needs of those who desire a general knowledge of

the subject, as well as to lay the foundations for advanced work. Particular attention is paid to the correct statement of principles so that in his advanced work the student will have nothing to unlearn or relearn. Text-book, *Millikan and Gale*.

[Three hours a week of two semesters.]

LABORATORY WORK of this course consists of a series of experiments which verify and apply practically the fundamental principles of physics. The student also receives instruction in the use and careful handling of apparatus, accurate observation, and correct deduction of results. Neat and concise reports of all experiments are kept by each student and form the basis for the grades in this work. Laboratory Manual, *Millikan and Gale*.

[Two hours (four hours of actual work) each
week for two semesters.]

GRAMMAR SCHOOL WORK

The courses of the Preparatory School outlined above are equivalent to those of a High School. There is also a Junior Preparatory Department in which are taught all the branches of a Grammar School—the students having every opportunity of preparing themselves as rapidly as possible for High School work.

COMMERCIAL SCHOOL

THE COMMERCIAL SCHOOL

When the character and needs of the country are considered, courses in business will appear the most practical, and among the most important that an educational institution can offer.

Students, therefore, who have not the time or the means to take a complete college course in the classics or the sciences, will do well to enroll themselves in the Commercial School. No plan of study is more injudicious than a haphazard selection of such studies as an inexperienced young man may fancy. The training resulting from a fixed program of studies is of the utmost benefit to the student.

The commercial studies at Columbia have always received the most careful attention from the officers and from the Commercial Faculty. Columbia claims to give the students of this School a more complete business training than can be obtained in any purely commercial school. The authorities require that students taking this program—which may be completed in one year—should be at least 16 years of age and should have completed two years of a regular High School course or its equivalent. Special arrangements, however, will be made for young men who have had no High School training, but who may have had practical business or office experience. Should a student desire to pursue any other studies in which he may be interested and for which he has time, he will have liberty to do so. A diploma is issued to students completing all the courses of the program satisfactorily.

PROGRAM OF INSTRUCTION

FIRST TERM

I.

ARITHMETIC. Percentage; ratio and proportion; as far as involution and evolution. *Commercial Arithmetic*. Recitations daily.

II.

BOOKKEEPING. Preparatory instruction and definitions; initiatory sets by Double Entry; retailing by Double Entry; special practice in writing business paper and business forms. *New Complete Bookkeeping, Williams and Rogers*. Recitations daily.

III.

ENGLISH. Study of the theory of English composition; frequent exercises in theme writing. The principles of rhetoric. Recitations daily.

IV.

*PHONOGRAPHY. Recitations daily.

V.

TYPEWRITING. Three hours a week.

VI.

PENMANSHIP.

*Phonography is free to commercial students in the final year of their program. For typewriting fees see page 19.

SECOND TERM

I.

BOOKKEEPING. Single Entry ; changing Single to Double Entry ; retailing ; wholesaling ; shipping and commission ; jobbing ; manufacturing ; installment and state agencies ; joint stock companies ; banking ; railroading. *New Complete Bookkeeping, Williams and Rogers*. Four hours a week.

II.

ARITHMETIC. Percentage, ratio and proportion (reviewed) ; involution and evolution ; arithmetical and geometrical series ; higher percentage ; mensuration ; arithmetical analysis. *Higher Arithmetic, Brooks*. Recitations four hours a week.

III.

BUSINESS PRACTICE AND OFFICE WORK. Four hours a week.

IV.

BUSINESS CORRESPONDENCE. One hour a week.

V.

COMMERCIAL LAW. General principles of contracts ; agency ; partnership ; corporations ; guaranty ; sale of goods ; negotiable paper. *Huffcut*. Two hours a week.

VI.

PHONOGRAPHY. Speed class. Recitations daily.

VII.

TYPEWRITING. Speed class. Daily.

VIII.

PENMANSHIP.
